

Gortor Roof Hatches - RHTG

Glazed roof hatch with triple glazing HR+++

Innovation in Roof Access ...

Gortor® always on top!

Gorter Roof Hatches

- » Natural daylight in the room below
- » Construction with thermal break technology
- » Reliable, Safe and Durable
- » Available complete with fixed stairs
- » Available sizes:
1000 x 1500 mm, 1000 x 2000 mm,
900 x 2400 mm, 900 x 3000 mm.

Insulation: $U_w \leq 0.83 \text{ W}/(\text{m}^2 \cdot \text{K})$
HR+++ glass: $U \leq 0.500 \text{ W}/(\text{m}^2 \cdot \text{K})$

Supplied with ventilation switch
and remote control

Thermally insulated curb

Thermally insulated cover

Safe handhold for ascending
and descending

Fall and break-in proof
HR+++ glass

Powder coated in two colours
RAL 9005 / 9010

Equipped with two powerful
electric motors as standard

Wind- and watertight
sealing all around

Self-cleaning glass due to
pitch of hatch

Burglar-proof
stainless steel hinges

Ten Good Reasons to Specify or Install a Gorter Roof Hatch

The roof space of buildings are increasingly being used for mechanical appliances such as air conditioners, lift motor rooms and machine rooms, as well as roof terraces, roof gardens and emergency escape routes. This is why it is vital for any roof access solution to be high quality, durable, convenient to use, and above all; safe, to meet increasingly stringent safety standards.

» Gorter supplies safe roof access solutions which are aesthetically pleasing, easily integrated into any design, convenient, durable and will ultimately save money and contribute to the safe and long term operation of any commercial, industrial or residential building project.

1

Money Saving Roof Access

Gorter roof hatches offer safe and convenient access to any roof space. Gorter roof hatches offer a simple and money saving alternative to a vertical door construction for roof access. The Gorter range of roof hatches are aesthetically pleasing and unobtrusive. This allows easy integration into any design.

2

SAFETY Features for the End-user

Gorter RHTG roof hatches are opened and closed with the push of a button. The handrail provides a good handhold when ascending and descending. The glass is laminated, offering fall protection when the hatch is closed.

3

A Complete Access Solution

Depending on the dimensions, roof hatches can be combined with Gorter fixed stairs. Tests have shown that this Gorter combination meets safety standards.

4

We Have Thought of the Architect

The Gorter website has standard drawings and specifications available on our wide range of access products. Gorter's experience staff can also provide advice, test reports, as well as safety approvals. This allows the architect to specify a Gorter product with confidence. Please contact us for custom drawings or specifications. www.gortergroup.com

5

Less Mass, More Class

Because at Gorter many of our staff are from the building industry, we understand such a job is physically demanding. That is why many of our products are manufactured from aluminium, making it just as strong and durable but up to 3 times lighter than a similar product made from steel or stainless steel. This ensures a Gorter product is easy to install and handle.

6

Easy Installation at Minimal Cost

Gorter products are supplied completely assembled. We have even predrilled mounting holes in the flange. Installation consists of simply placing the hatch over the roof opening, bolting it in place, and ensuring watertightness by flashing underneath the curb. All this can usually be done in the space of around 1 hour.

7

Weathertight Construction

The roof hatches are designed to be weather and wind-proof and are provided with high-quality insulation of $U_w \leq 0.83 \text{ W/(m}^2\text{K)}$. The HR+++ glass has an insulation value of $U \leq 0.500 \text{ W/(m}^2\text{K)}$. Standard sound reduction: 27 dB.

8

Strong and Durable Construction

Gorter roof hatches have a robust construction. They are anodised and powder coated in two colours. The glass is laminated with burglary-resistant foil. All materials are 100% recyclable.

9

Bringing in Natural Light

Wherever natural light is needed in the room below, a glazed roof hatch can be the solution. Examples include use as rooftop deck access or in offices and industrial and commercial buildings.

10

10 Year Warranty and Certified Safety and Quality

Gorter Roof Hatches come with an industry first warranty of 10 years. The safety, performance and construction of our Hatches with or without a stair, safety ladder or fixed step/rung ladder is certified by Australian, European and International standards and notified bodies for your peace of mind. 1 year warranty on electrical control and stairs.
